## PRODUCT OBSOLETE NOTICE - ELC AND ELC/F RELAY PRODUCTS

*In July 2014, Ampcontrol will cease manufacture of a number of ELC and ELC/F relay products. These products will no longer be available for purchase and this may impact some customers.*

### WHAT IS PLANNED FOR THE ELC RELAY

---

As part of Ampcontrol's continuing review of products to ensure they provide the latest technology and comply with the latest standards, a number of ELC and ELC/F products will be made obsolete. This advance notice is intended to provide the customer with time to determine a course of action for current installations.

### PRODUCT SUPPORT

---

The ELC relay will still be supported for testing and repair by Ampcontrol but they will no longer be supplied as a new-for-old replacement. Where a replacement is required, the ELD V2 will be supplied. The ELD V2 relay complies with the latest standard for electrical protection, AS/NZS2081:2011.

While the ELD V2 is intended as a replacement for the ELC and ELC/F, the relay differs in physical size and arrangement and therefore consideration must be made of these changes when replacing the ELC or ELC/F relay in existing applications. For more information on ELD V2 Earth Leakage relay, please refer to the Technical Datasheet or User Manual.

Ampcontrol is able to assist any customers who wish to upgrade from these discontinued products.

### PRODUCT INFORMATION

---
